Professional Summary

Security engineer with 3+ years across application security, cloud security, and detection engineering. Sole security lead for a HIPAA-regulated healthcare SaaS: led a third-party pentest engagement to a 0-Critical / 0-High result, remediated 500+ AWS Security Hub findings, and shipped 127 security patches across backend, SPA, and LLM agent codebases. Prior 2.5 years as de facto L2 SOC shift lead engineering SIEM/XDR/EDR for Fortune 500 and multinational telecom clients with ransomware RCA experience. M.Sc. Cybersecurity & Privacy, NJIT (3.9 GPA); CompTIA Security+.

Professional Experience

Medlaunch Concepts, *Lead Cybersecurity/Cloud Specialist (promoted from Intern)* **Feb 2026 – Present**

- **Defense-in-Depth & Risk Management:** Engineered AWS controls for HIPAA-regulated healthcare SaaS: WAF (default-Block + 5 custom rules), Macie weekly PHI/PII classification, GuardDuty, Inspector ECR scanning, CloudTrail + Security Hub, PHI audit middleware on 19 route prefixes. **Remediated 500+ Security Hub findings** (IAM over-permissions, SG misconfigs, missing logging, public-access exposures); closed 85% of SOC 2/HIPAA gaps in 4 months. Authored NIST SP 800-30 risk assessment mapping 16 assets x 18 vulnerabilities to HIPAA safeguards.
- **Application Security & Pentest Hardening:** Led pre-pentest hardening across backend (Express/Mongo), SPA (React), and LLM agent (FastAPI/Bedrock) repos — shipped **127 security patches** (82 BE / 30 FE / 11 AWS / 4 CI/CD): JWT HS256 algorithm pinning + sessionVersion revocation, double-submit CSRF, IDOR org-scoping on 4 endpoints, ReDoS escaping in 11 Mongo \$regex sites, AWS metadata SSRF block, HttpOnly cookie auth migration, prompt-injection envelope wrapping for LLM tool outputs. **Casco third-party pentest result: 0 Critical / 0 High / 2 Medium / 4 Informational**, all remediated.
- **Cloud Infrastructure & Audit Pipelines:** Architected multi-environment AWS (dev/staging/prod): VPC with private subnets, ECS/ECR, ALB + ACM TLS, Route 53, VPC peering to Atlas. Built 3 audit log pipelines — GitHub org webhooks via API Gateway + HMAC-SHA256 Lambda, Entra ID via Graph API, MongoDB Atlas via VPC-deployed Lambda through NAT Gateway — writing to S3 Object Lock 365-day Governance for tamper-proof storage. Integrated Sengrep SAST + OWASP ZAP DAST + Gitleaks across 15 GitHub repos.
- **Identity & Access Management:** Designed zero-standing-admin AWS Identity Center + GitHub OIDC architecture — tag-scoped permission sets per persona, JIT login via SSO (8s flow → 4h auto-expiring creds), task-role rotation ~6h, breach blast-radius capped at one task / one role / 6h. Administering Entra ID SSO for 40+ users with SAML/OIDC; enforced MFA via IAM for 12 console users. AWS IAM audit of 70+ roles / 20 users / 60+ S3 buckets remediated 4 Critical + 6 High findings.

Medlaunch Concepts, *Cybersecurity/Cloud Specialist (Intern)* **Sept 2025 – Dec 2025**

- **Security Hardening & Policy:** Improved platform security score from 600 to 900 (50% improvement) via CSP, HSTS, and security header fixes. Conducted pen testing identifying 8+ vulnerabilities, all remediated. Drafted 8 security policies mapped to SOC 2/HIPAA. Introduced security branch workflow enforcing 100% code review before production.
- **Compliance & Monitoring:** Conducted gap analysis against ISO 27001 and HITRUST, identifying 45+ compliance gaps. Built CloudWatch dashboards with automated alerting covering 100% of AWS infrastructure. Consolidated 5+ fragmented DNS domains into centralized Route 53 management.

Terralogic Software Solutions Pvt Ltd, *Cyber Security Analyst (promoted from Intern)* **Jun 2021 – Dec 2023**

- **Security Engineering:** Deployed and integrated SentinelOne EDR, Stellar Cyber XDR, and LogRhythm SIEM across enterprise clients (Fortune 500 automotive, multinational telecom). Led tool migrations, onboarded 85+ log sources, and built cross-platform integrations with Palo Alto NGFW and Radware WAF. Managed bi-weekly vulnerability scanning (Nessus, Qualys) achieving 85% critical/high remediation within 30-day SLA.
- **Detection Engineering & Operations:** Served as de facto L2 shift lead triaging 1,200+ events/year. Engineered 80+ correlation rules and custom regex-based triage filters, reducing false positive rate by 60% and mean triage time from 30 to under 10 minutes. Conducted proactive threat hunts for anomalous authentication, lateral movement, and C2 beacons.
- **Incident Response & Forensics:** Led 15+ incident investigations including multiple ransomware engagements. Conducted memory dumps, disk imaging, and IOC extraction. Delivered root cause analysis (RCA) reports identifying attack vectors and recommending remediations. Fed 45+ unique IOCs into threat intelligence databases shared across 8 client environments.
- **Leadership & Operations:** Managed real-time SOC operations as shift lead, serving as L2 escalation point. Authored 25+ MITRE ATT&CK-mapped playbooks covering 12 threat tactics with automated alert enrichment workflows. Led knowledge transfer for new hires and mentored junior analysts on threat classification methodology.
